

Very clean Street Bob for sale! 2010 Harley Davidson FXDB

I have a 2010 Harley Davidson Street Bob (FXDB) I would like to sell. The bike has been customized to a degree but I have all the original parts that I replaced (I wanted it to be all black). The "wild hawg" decals are easily removed and the original HD tank badges are to go with the bike. The bike has 14,000 miles on it and hasn't been ridden much lately. It has never been crashed or dropped and has been garaged 24/7/365. The tires are new. All the gear is OEM. Vance and Hines (HD approved) exhaust, various blacked out components, digital oil cap/gauge and quick detachable windscreen. The bike is smooth and fast and handles very well. I am trying to finish a 1956 Triumph pre-unit restoration which will become my rider. I am 76 and the much heavier Street Bob is hard for me to handle because of the weight.

Below are pictures of the bike. I can easily send more photos or even a video if desired. I want to sell before the riding season is over.

I am asking \$9,500 but I might be open to negotiation. Current value is listed as \$12,000 (+/-). Its a really nice bike and is perfect for someone wanting a Harley on a smaller budget.

Details are available for serious buyers.
